

May 24, 2017

Dear Jessica June Children's Cancer Foundation,

I am the clinical social worker at University of Miami/Sylvester Comprehensive Cancer Center/ alex's place.

Hildebrando Schwarzenberg is a 12 year old boy who recently began treatment for his illness, Mixed cellularity Hodgkin lymphoma of lymph nodes. Hildebrando's biological mother is his primary caregiver and stated that she has had to stop working because of his several follow-up medical visits. With mother not having her income at this time, she stated that it is difficult to maintain the overall household expenses. Therefore, any help would be greatly appreciated for this family.

Hildebrando is a wonderful young boy, who is confident that his positivity will carry him through this bump in his road. He has such a powerful family support system that encourages him daily on the beauties of his life and how to remain encouraged for the future.

Thank you,

  
Ida Rodriguez, alex's place clinical social worker
