June 13th, 2018

Dear Jessica June Children's Cancer Foundation,

Decarlos Lesesne is a nine year-old pediatric oncology patient at Salah Foundation Children's Hospital at Broward Health Medical Center. He was diagnosed with Grade 4 Medulloblastoma on January 13th, 2018. Decarlos underwent surgery and was referred for specialized treatment called proton beam radiation. Decarlos and his family traveled from their home in Ft. Pierce to Jacksonville, FL for six weeks. After Decarlos's diagnosis, his mother took an absence from work, and has not been able to return due to his strenuous treatment schedule. Decarlos receives his specialized care at Broward Health Medical Center in Fort Lauderdale, and the family travels weekly for his treatments. This family would benefit greatly from the support of the advocacy program during this difficult time. We appreciate Jessica June Children's Cancer Foundation for being there to support our pediatric oncology families when they need it most.

Sincerely,

A handwritten signature in black ink that reads "Melissa Stachowiak". The signature is written in a cursive style.

Melissa Stachowiak, LCSW
