RE: Jovon Moss

.....

The Jessica June Children's Cancer Foundation was able to provide rent assistance to the mother of Jovon Moss, a 3 year old boy with a diagnosis of Large B-cell Lymphoma and in active treatment with chemotherapy at our facility. This assistance was a huge help to mom who had to quit her job in order to provide direct care to Jovon. Mom is a single parent with two other small children to care for. Mom has initiated an application for SSI benefits on behalf of Jovon and is in the process of waiting to hear Social Security's final determination.

As Jovon's social worker, I ask that you consider for your Advocacy Program for any additional financial assistance possible. Jovon is enrolled in a lengthy chemo protocol and mom will greatly benefit from any additional support possible. Thanks to you, JJCCF, for helping alleviate the financial strain families of cancer children experience!
