

October 8, 2018

Dear Jessica June Children's Cancer Foundation,

Ahmad Tasbih is a 16 month old pediatric oncology patient at Salah Foundation Children's Hospital at Broward Health Medical Center. Ahmad was first diagnosed with hepatoblastoma in April 2018 when he was only 11 months old. Ahmad was treated throughout this year for his liver cancer with chemotherapy and surgery. Unfortunately, in August 2018, it was discovered that Ahmad's cancer has spread to his lungs. He continues to require chemotherapy which will go on for at least six more months. His treatments are primarily inpatient and he has needed additional time in the hospital due to complications from his treatment.

Ahmad's father had been working full time initially, but has had to take increasing leave from work in order to support his son throughout his treatment process. Ahmad also has a twin brother and his mother is not working. His parents are without support from family in this country, caring for their two young sons. This family would benefit from any assistance possible during this time of need. Thank you to the Jessica June Children's Cancer Foundation for the support that would be so beneficial to this family.

Sincerely,

Melissa Stachowiak, LCSW
Social Worker
