

June 25<sup>th</sup>, 2013

To Whom It May Concern:

Lazorah Atwell is a two year-old patient at Chris Evert Children's Hospital Pediatric Hematology/Oncology Clinic at Broward Health. She is diagnosed with an Acute Lymphoblastic Leukemia (ALL), a cancer that affects the blood and bone marrow. Lazorah first came to Chris Evert Children's Hospital when she was 16 months old, and continues to require ongoing treatment.

Lazorah receives intravenous chemotherapy treatment at the hospital several times per month. Additionally, she requires several prescription medications in order to treat her cancer and prevent infections. She requires frequent hospitalizations due to complications related to her cancer. Lazorah's mother has been unable to work due to her ongoing care. Her family would benefit from financial assistance due to the cost and time of Lazorah's treatment. Thank you for your consideration.

Sincerely,

Melissa Stachowiak, LCSW
