

June 27th, 2013

To Marjorie Cyrille is a sixteen year-old patient at Chris Evert Children's Hospital Pediatric Hematology/Oncology Clinic at Broward Health. She is diagnosed with relapsed Acute Myeloid Leukemia (AML). Marjorie was first diagnosed in November 2011. She is currently undergoing her third course of treatment, as she has relapsed twice.

Marjorie's struggle has been long and arduous, as she initially had to discontinue chemotherapy due to an infection being found during her treatment. She is anticipating a bone marrow transplantation, but has been unable to receive this due to the infection. She requires frequent office visits, and is often hospitalized due to her condition, as well as the infection.

Despite these challenges, Marjorie always comes to the hospital with a smile on her face and a positive attitude. Her family is always by her side to support her throughout this difficult journey. The family is in desperate need of financial assistance due to the strain Marjorie's illness has caused on their household. Thank you for your consideration.

Sincerely,

Melissa Stachowiak, LCSW

Social Worker
