RE: Patient, Milton Stubbs  
DOB : 09/12/1996

Dear Jessica June Advocacy Program:

This letter is to request assistance for the family of patient, Milton Stubbs, a 17 year old boy diagnosed with Nasopharyngeal Carcinoma and having a history of metastatic craniopharyngeal carcinoma. Since the patient has been diagnosed he has received chemotherapy as well as radiation therapy.

The patient currently resides with his mother and three other siblings. The patient's mother is a single mother who provides care and financial support to her children. However, mom has fallen behind on basic need bills, such as her rent, water, light, groceries. Mother is employed; however, her hours of work were recently reduced. It is hard for the mother to make ends meet for her four children.

It is for this reason, mother has requested assistance through the JJCCS, advocacy program. Please assist the family with any help possible. This family is really needy and would appreciate your support.

I thank you in advance.

Sincerely,

Evelyn Gonzalez, MSW  
Pediatric Social Worker  
Miami Children's Hospital
