Re: Jonathan Miller

To whom it may concern:

Request for Admittance into JJCCF's Advocacy Program

Jonathan is a 14-year-old patient at Johns Hopkins All Children's Hospital. He has been receiving treatment at our hospital since December 2022 for Alveolar Rhabdomyosarcoma stage 4. Jonathan's parents are in the process of getting divorced therefore the mother has not been able to work due to the treatment requirement which has put a significant financial strain on this family. Along with the medical bills the mother has incurred non-treatment related expenses such as gas, food, etc. due to the distance they must travel to our hospital. Jonathan has an older sibling who resides in the home as well. Jonathan and his family would greatly benefit from any financial assistance that can be provided to help them through this time.

Best,

Lisa Petrucelli, LCSW
