Dear Jessica June Children's Cancer Foundation

Camila is a 6-year-old girl who was diagnosed with Leukemia. On December 2, 2021, after many weeks of testing, procedures and follow-ups, her family was informed of her diagnosis. Camila has endured various rounds of chemotherapy and is currently receiving maintenance therapy.

Camila resides at home with her mother; her father resides separately. Her mother is a single parent, she's her full-time caregiver and the home's sole provider. When Camila was diagnosed, her mother was able to work from home, however, due to the frequent admissions and follow-ups, she was let go from her position. This resulted in the family undergoing extreme financial hardship and not being able to cover the home's expenses. Anxiety and concern were prominent feelings shared by mother pertaining to finances as well as in the emotional aspect. Mother does not have any relatives locally to provide support.

Mother has attempted to seek employment that can accommodate the patient's appointments without success. Financial resources have been limited and difficult to obtain for support to the family; resources available have been exhausted. The family continues to struggle with household bills and expenses and is in need of financial support.

Your kindness and generosity is greatly appreciated by us and by the family. Camila and her mother value your support.

Thank you,

Yanara Del Valle, MSW
