MIAMI CHILDREN'S HEALTH SYSTEM 

October 16, 2018

Dear Jessica June Children's Cancer Foundation,

David Anaya is a 4 year old pediatric oncology patient at Nicklaus Children's Hospital. David is diagnosed with low grade optic pathway glioma, autism spectrum disorder and neurofibromatosis Type I. David is seen by multiple specialists and his grandmother is his primary caretaker often transporting him to varied medical appointments. David currently resides with his grandparents and the family would greatly benefit from any financial support from the advocacy program during this difficult time.

Jessica June Foundation continues to provide assistance to many of our families and we are grateful for this. Any assistance for David and his family would ease the financial burden for this family at this time.

Sincerely,

Stephanie McGuiness, LCSW

Pediatric Social Worker
